

QUESTION:

Sol Systems would like to submit the following question regarding the [Yorktown RFP for Solar PV and Other Energy Systems](#) :

Would the Town be open to alternative proposals on Town-owned properties not listed in the RFP? Would the Town be interested in a Remote-Credit PPA in lieu of a lease proposal? Community solar leases will not provide value to the Town, due to 1) the full allocation and closing of the Con Edison tranche of the VDER CDG Community Credit incentive as of 10/06/2021 and 2) the small estimated size of each of the solar arrays that could be developed on the RFP-included Town-owned properties. Instead, the Town could find more value in developing one or multiple larger solar farms on a Town owned parcel, sell solar energy back to the grid for VDER credits, and "Remote Credit" VDER credits generated by this project to the utility accounts of each of the Town-owned properties listed in the RFP.

ANSWER:

The Town will consider all proposals it receives.
