

Question & Answer Document #1

Q: On the bid summary table caustic 50% is listed, but it doesn't give quantity per year. Can you tell me what the quantity is per year and how many gallons per delivery?

A: WPC takes 3,000 gallons of caustic per month and on rare occasions a short tank of caustic will be ordered at 2,500 gallons. This is due to the storage tank structure and being able to take a full load.
