

TOWN OF YORKTOWN
WESTCHESTER COUNTY, NEW YORK
ROUTE 118 AND UNDERHILL AVENUE INTERSECTION
Capital Improvement Project #25-4

ADDENDUM NO. 1

TO ALL BIDDERS:

This addendum is issued this day in conformance with Part Two, Section 3.4 of the Instruction for Bidders, in the Contract Documents. The information contained in this Addendum supersedes, replaces, or supplements the Contract Documents and is made an integral part of the Contract. This Addendum must be attached to each bidder's contract and submitted along with his bid.

Now, herewith, all bidders shall take the following items into account when preparing their bid:

1. There are no provisions for liquidated damages in the bid.
2. A bid bond or 5% cash bond should accompany the bid. The AIA bid bond form is acceptable.
3. Some work will be performed with the NYSDOT Route 118 ROW; therefore, NYSDOT insurance requirements will supersede the Town's requirements. The project area also includes the Town's Underhill Avenue ROW. Separate proof of insurance documents will be required for the Town and NYSDOT.
4. For Item 206.03 how should we bid this? The drawings show new sidewalk and ramps however the bid does not include it. Our original quote did not include restoration. If there isn't going to be new ramps and sidewalks we will have to adjust our Conduit Excavation and Backfill price to include sidewalk restoration in areas where we need to excavate under sidewalks.

Response: It is planned that the Traffic Signal Installation (Bid #25-4) and Intersection Improvements (Bid #25-3) work will occur concurrently. As indicated in Note No. 3 on Page 2 of the Bid Documents each of the selected Contractor's will be responsible for coordinating their work, in consultation with the Town. Therefore, it is the intention of the Town for example conduit excavation/installation work will be coordinated such that it will be installed prior to any sidewalk/ramps and therefore restorations by the Traffic Signal contractor will not be required.

5. Please clarify if the Town, County, and/or the NYSDOT will waive permit fees for this project.

Response: The Contractor will not be responsible for any permit fees.

6. Please advise if any street obstruction bonds or deposits will be required with any required permits.

Response: The Contractor will not be responsible for any street obstruction bonds or deposits.

7. Please advise if Town will be responsible for all inspections and testing (including hiring lab and arranging & paying for testing).

Response: The Contractor will not be responsible for any Inspections/Testing for the Project.
